

Serial No.: 10/522,546
Docket No.: 28955.4021

Amendment to the Specification

Please amend the paragraph which appears at page 2, lines 4-11 of the specification, as follows:

In addition, as the luminescent materials for the above devices, there are known chelate complexes such as tris(8-quinolinolato) aluminum complexes, coumarin derivatives, tetraphenyl butadiene derivatives, bis-styryl arylene derivatives and oxadiazole derivatives. It has been reported that these luminescent materials emit blue to red light in a visible range, and it is therefore expected to apply these luminescent materials to production of color display devices (for example, Japanese Patent Application Laid-open Nos. Hei 8(1996)-239655, Hei 7(1995)-138561 and Hei 3(1991)-200889 ~~200289~~, etc.).
